

PPI's EZ Slider series provides a variety of loading zone options. The EZI is equipped with rubber disc rolls that provide impact absorption for light to medium duty loads. For applications beyond the loading zone, the EZS has steel idler rolls in the center position providing excellent load support. The EZR is a light duty slider bed that can be used in the loading zone and beyond providing continuous support throughout the trough. All three versions are equipped with rails in the wing position to provide excellent support for skirt board sealing.

FEATURES AND BENEFITS

- EZ Slider uses standard impact idler frames
- Seals skirt boards in the loading zone
- Impact rolls in center position on the EZI improve impact absorption
- Available for all belt widths
- Standard dimensions - lines up with standard PPI Idlers

EZS

EZR

*EZ Sliders are not recommended for use beneath crushers. Use an Impact System (TIS) for conveyors placed directly underneath crushers. Slider beds with rails in all three positions are not recommended for impact absorption.

EZ SLIDER

Assembly part number - Uses 5 frames for impact sections and 3 frames for sealing sections.

EZI - EZ slider with impact roll in the center - this type is recommended for medium impacts

EZS - EZ slider assembly with steel center roll - used beyond the impact zone, for sealing.

EZR - EZ slider with rails in all three positions, used for light impacts only.
