

PPI's V-Return Idlers are available with 4.5" and 7" drop heights and are built with a 10° two roll trough configuration that allows gravity to naturally keep the belt centered. The shorter two roll design enables the user to implement much lighter rolls than the traditional single roll configurations.

FEATURES AND BENEFITS

- CEMA C, D, and E in 4.5" and 7" drop heights
- CEMA F in 7" drop heights
- 10° trough angle allows gravity to naturally track the belt
- Available in CEMA C, D, E, and F series
- Available with rubber disc rolls
- Two rolls to aid in replacement by reducing weight
