

Protecting the most valuable piece of the conveyor system, the belt, is vital to maintenance personnel. PPI's Beltsaver Bracket outward bend design allows the belt to track off of the centerline further than traditional style return roll drop brackets. The extra space provided by these drop brackets alleviates damage to the belt and minimizes the risk of the belt cutting through drop brackets.

### FEATURES AND BENEFITS

- Protects the edge of belting by allowing more room to wander
- Minimizes potential of cutting through drop brackets
- Uses standard rolls
- BeltSaver<sup>™</sup> II Bracket part number #14207
