

The Pro Duty drum pulley represents a revolutionary change in the conveyor pulley industry. It is a single drum pulley line that can be used everywhere from the everyday light aggregate conveyor to the toughest Quarry Duty application. You no longer have to guess which pulley you need because the Pro Duty covers them all.

### FEATURES AND BENEFITS

- Profiled end discs are machined from solid steel with an integral hub rather than using a welded hub. Removing this welded hub eliminates the most common cause of pulley failure
- The tapered profile end disc shape reduces the bending force transferred from the shaft into the pulley
- The profiled end discs reduce stress on bushings and decrease incidence of shaft walking
- Only available in XT® bushings or keyless locking assemblies
- Industry leading 10 year warranty

A PREMIUM PRODUCT AT A STANDARD PRICE.

THE RESULTS ARE PROVEN

The life of the Pro End Disc is double of the Welded End Disc coming in at the standard price.
