PRECISION, INC. HOSTS NATIONAL MANUFACTURING DAY

Personal involvement with students encourages future manufacturing workforce

PELLA, IOWA - Precision, Inc. gave students a personal look at manufacturing and the impact of Precision pulleys around the world, for Manufacturing Day 2019. Young people from area schools saw the importance of manufacturing careers locally, and how Precision is solving problems globally. Manufacturing Day is a nationally-recognized event, for youth to experience the opportunity and excitement within manufacturing.

Visiting students designed, assembled and tested pulley replicas, and experienced manufacturing on a plant tour. Students also imagined the future of pulleys and conveyors, suggesting conveyor systems could someday replace roadways and assist those with physical challenges.

As a 100% employee-owned company, Precision encourages a personal commitment to the business, local communities and engaging the future workforce. Manufacturing Day provides a platform for Precision employee owners to participate in all three. Lyndi De Vries of Precision, Inc. helped host students, including her daughter, and shared, "I was very impressed with everyone's creativity and how happy and excited the students were. Getting to share what you do every day with kids is really rewarding."

About Precision, Inc.

Since 1977, Precision, Inc. is committed to constantly innovating to create remarkable customer and employee experiences. Precision Pulley & Idler (PPI), as it was initially known, welcomed a second division in 2017 named Precision Food Innovations (PFI). Today, both PPI and PFI are unique yet thrive with the shared vision and values of Precision, Inc., which highlight respect, relationship and service. Over the last four decades, the company has built a robust infrastructure and product diversity, positioning itself as the #1 supplier for pulleys and idlers in North America according to the Conveyor Equipment Manufacturers Association (CEMA). After the acquisition of The Chantland Pulley Company, Precision has nearly 1,200 employees in 16 locations worldwide, and serves markets that move rock, grain, packages, food and more, with safe and productive conveyor solutions.
