

The PPI Spiral Wing and Spiral Plus Wing Pulleys are formed by winding flat bar spirally from the center of a wing pulley to the outside ends. This continuous belt contact design eliminates excessive noise and vibration, while still providing a cleaning effect and allowing a path for debris to escape rather than being trapped between the pulley and belt.

## FEATURES AND BENEFITS

- Spiral wings are gentler on mechanical splices than standard wings
- Spiral allows continuous belt contact for reduced belt vibration and noise compared to standard wings

### SPIRAL WING PULLEY

- The Spiral Wing is available with either a crown or flat face. It is available in 6" through 60" diameter
- Additional sizes are available upon request
- Built using our proven Heavy Duty Wing construction

### SPIRAL PLUS WING

- Rugged design that uses our proven mine duty wing construction
- Thicker wings and spiral contact bar give added strength and wear resistance
- Available in sizes of 12" to 60" diameter and in crown or flat face
