

Possessing the same material shedding characteristics and wear properties of traditional rubber disc rolls, the Return Rubber Groove Roll (RRG) improves on an already great product. Built on the same steel tube as standard rubber disc returns the RRG is a single piece of rubber that is vulcanized on to the steel tube with the grooves machined into it. The single piece of rubber eliminates disc movement on the tube ensuring proper disc spacing the entire life of the roll.

FEATURES AND BENEFITS

- Reduces build up
- Built for the toughest applications
- Single piece rubber lagged roll - no discs prevent disc separation
- Available in CEMA C, D, E and E Plus
- Rubber Grooved Rolls available for troughing applications
- Available in Retro Rolls
