

Safety concerns for mining operations have come to forefront. PPI's Return Roll Cage provides protection to property and personnel from suspended idler rolls. As belts misalign, they may cut drop brackets of suspended return rolls causing the roll to fall. Installing a Return Roll Cage alleviates that risk by catching any dislodged roll.

FEATURES AND BENEFITS

- Reduces the hazard of rolls falling and causing damage or fatalities
- Easy installation
- Low-maintenance
- Large openings eliminate material build up
- Lightweight design
- Available in 12" and 24"

*Due to a wide variety of conveyor structures, beam clamps are not included.
