

MEDIUM DUTY SLIDER BED

PPI is proud to offer the medium duty slider bed; a cost effective solution for your impact and loading zone requirements. This slider bed is an ideal combination of impact absorption and belt support promoting a tight seal against skirting system. A modular design, available in 2', 4' and 5' lengths with foldable wings allowing the user to configure to their unique needs.

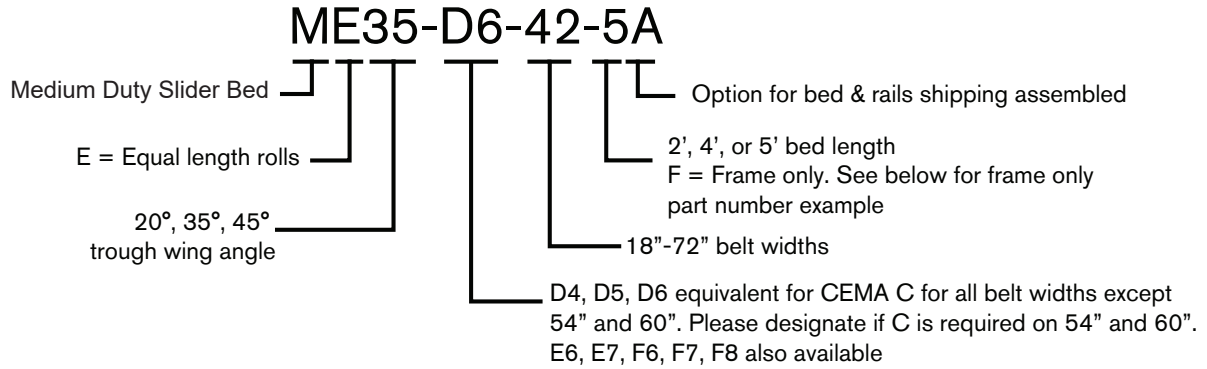

FEATURES AND BENEFITS

- Simple, cost effective way to provide continuous support of the conveyor belt against the skirting material
- Ultra-high-molecular-weight (UHMW) slider rails for skirt board sealing
- No moving parts
- Seals skirt boards in loading zone to reduce spillage
- Supports conveyor belt in loading zone
- C-Channel frames for increased strength
- Fold-down wings for ease of maintenance
- Modular design allows multiple units to be fitted end-to-end to form the length needed
- Match center-roll height of CEMA C and D idlers
- Available in belt widths from 18" through 72"

MEDIUM DUTY SLIDER BED
