

With dust control being a major issue in the material handling industry there has been an emergence of pipe conveyors. Put PPI's trusted idler roll design to work in a pipe conveyor panel designed to meet each user's unique application needs. PPI can retro fit not only the idler rolls for these systems but also the entire panel to match up with existing mounting requirements.

FEATURES AND BENEFITS

- Customizable pipe conveyor panels made to customer specifications
- Intuitive design that minimize hardware use
- Roll layout designed to meet the user's unique needs
- Utilizes PPI's proven idler roll design that can handle the toughest applications
