

The PPI Pro Tracker is a great solution for your belt tracking issues. With continuous engagement on the clean side of the belt, this lagged return trainer pivots to guide the belt to its central position, resulting in less material loss and belt damage. Mounted with two adjustable brackets for easy installation and no exposed frame for material build up, the PPI Pro Tracker will become your most reliable belt tracking idler.

FEATURES AND BENEFITS

- Continuous alignment
- Internal swivel
- Immediate centering engagement
- Lagging to shed material:
SBR Diamond Groove or Urethane
- Large diameter roll for long service life
- No frame for material to build up on
- Adjustable bracket for installation ease
- Sealed for life ball bearings
- Example Part Number:
TRACK-48L8DA (1/2" SBR diamond groove lagging)
TRACK-48U8 (1/2" Urethane lagging)

- 8" Diameter roll
- Belt widths of 18" to 72"
- Wide base belt widths of 18" to 66"
