

PPI 800 Series Split 10 Modular Belt Sprocket – innovative patented two-piece sprocket focused on reducing downtime and sanitary concerns. With a dual function design this sprocket can be placed in a locked or unlocked position. Installation is completed quickly with a stainless clamp and locking fastener. Compatible with multiple belt brands the PPI sprocket will seamlessly integrate with existing sprockets on the same shaft and belt. This product solves the time-consuming tedious task of machine disassembly and shaft removal to replace worn or broken modular belt sprockets. For sanitary inspections, all surfaces are easily accessible for cleaning and disinfecting.

## FEATURES AND BENEFITS

- Downtime reduction – Machine shaft removal not required for installation
- Sprocket is self-locking or floatable on the shaft – 1.5” shaft
- Easy to install self-aligning stainless clamp and hardware
- Twice the belt contact, one assembly – 3 PPI sprockets can do the work of 6 traditional sprockets
- Sanitary – made from acetal, all surfaces can easily be cleaned and disinfected

## PART NUMBERS

- 49348 - Sprocket Assembly
- 49347 - Split Sanitary Clamp 1.5” kit
